

LinkSCEEM-2 and High Performance Scientific Computing Panel

13 December 2011

e-AGE: 1st International Platform on Integrating Arab e-Infrastructure in a Global Environment

Towards Sustainable Computing e-Infrastructures across the Mediterranean

**Fotis Karagiannis,
Athens University of Economics and Business-Research Center
AUER-RC**

It's all about knowing the costs..

...their composition..

...and putting it in context!

Project Title

- Financial Study for Sustainable Computing e-Infrastructures

Main objectives

- **Analyse** the costs of the current European dedicated High Throughput and High Performance Computing (HTC/HPC*) e-Infrastructures for research
 - *HTC/HPC=loosely/tightly coupled parallel jobs (HTC=Grid)
- **Compare** them with the closest equivalent commercial leased or on-demand offerings
 - Cloud computing!
- **Evaluate** the findings through a report

European Grid Infrastructure

Towards a sustainable grid infrastructure

EGI.eu

NUIG*
(ICHEC)

ETL

EMERGENCE TECH LTD.

ETL

* National University of Ireland, Galway / Irish Centre for High End Computing (ICHEC)

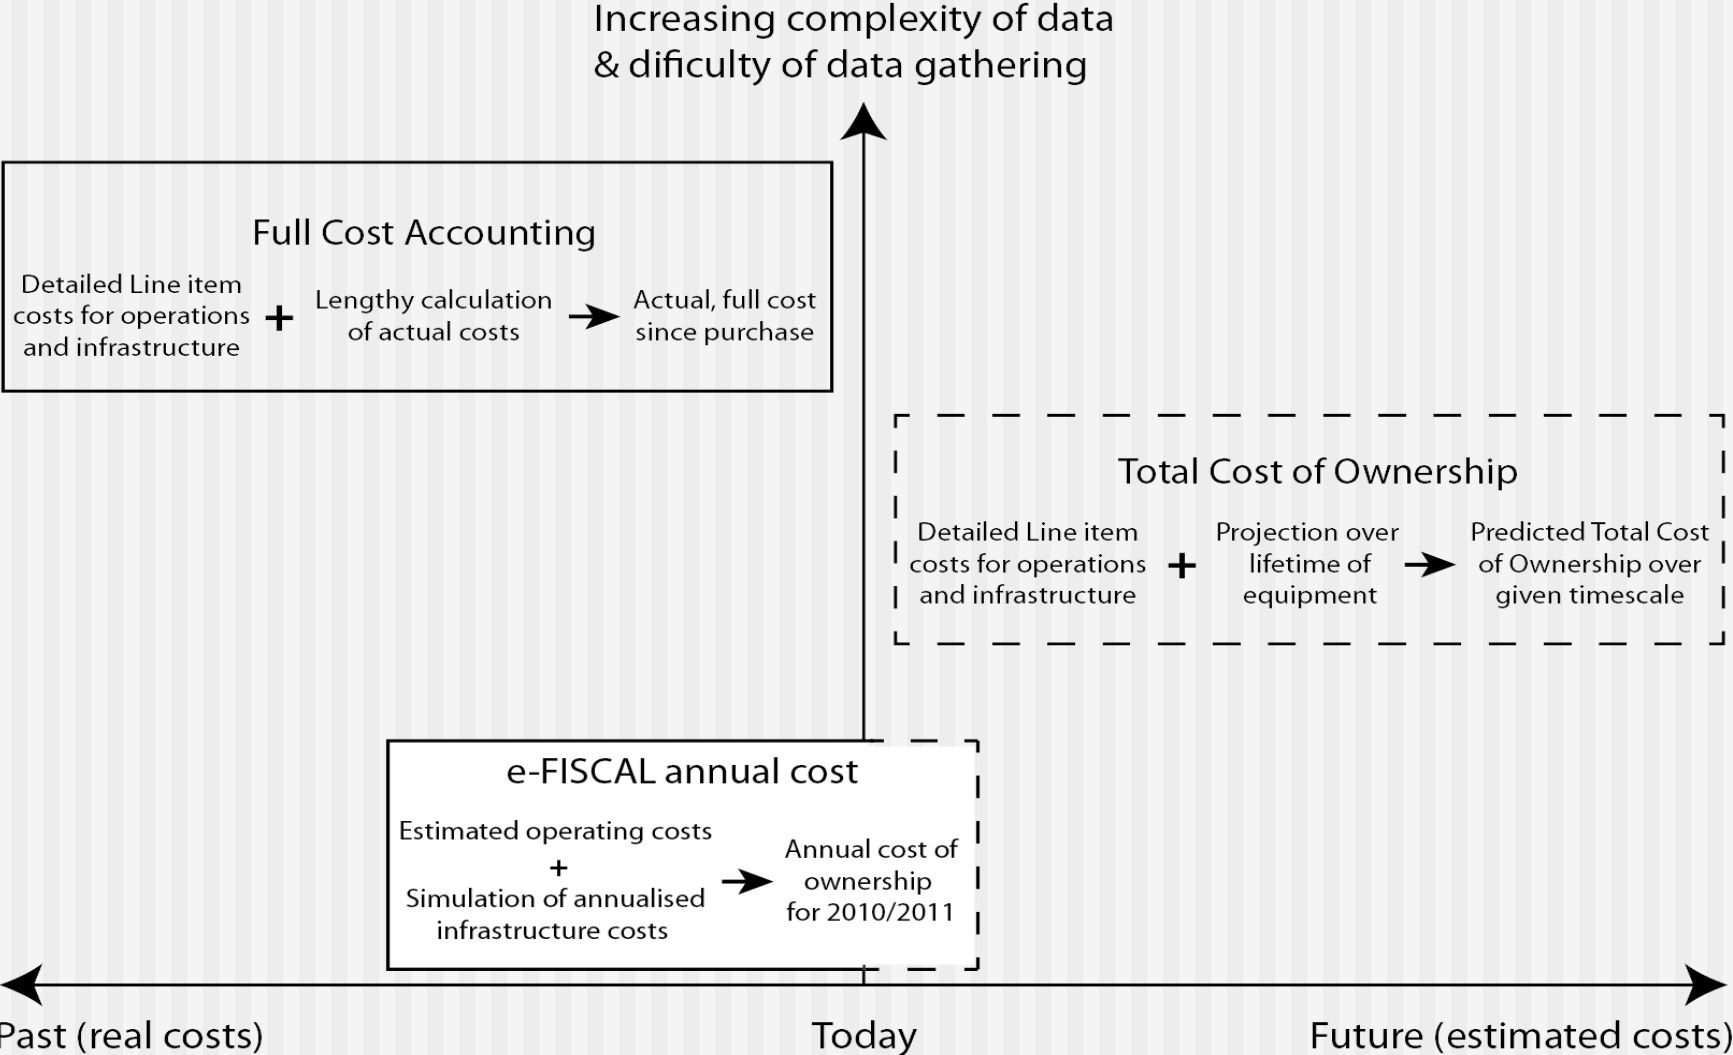

Background

- First in-depth study in Europe
 - Large sample of participants, HTC/HPC, comparisons with Clouds
- Builds on previous financial exercise
 - e-IRGPS2 project
 - Dealt with HTC (Grids) only, small number of NGIs involved -> initial charting of the area
- e-IRGSP2 highlighted the complexity
 - Findings available at <http://www.e-irg.eu/publications/>
 - Large range for overall cost estimate, **but** indicates EGI costs as competitive!

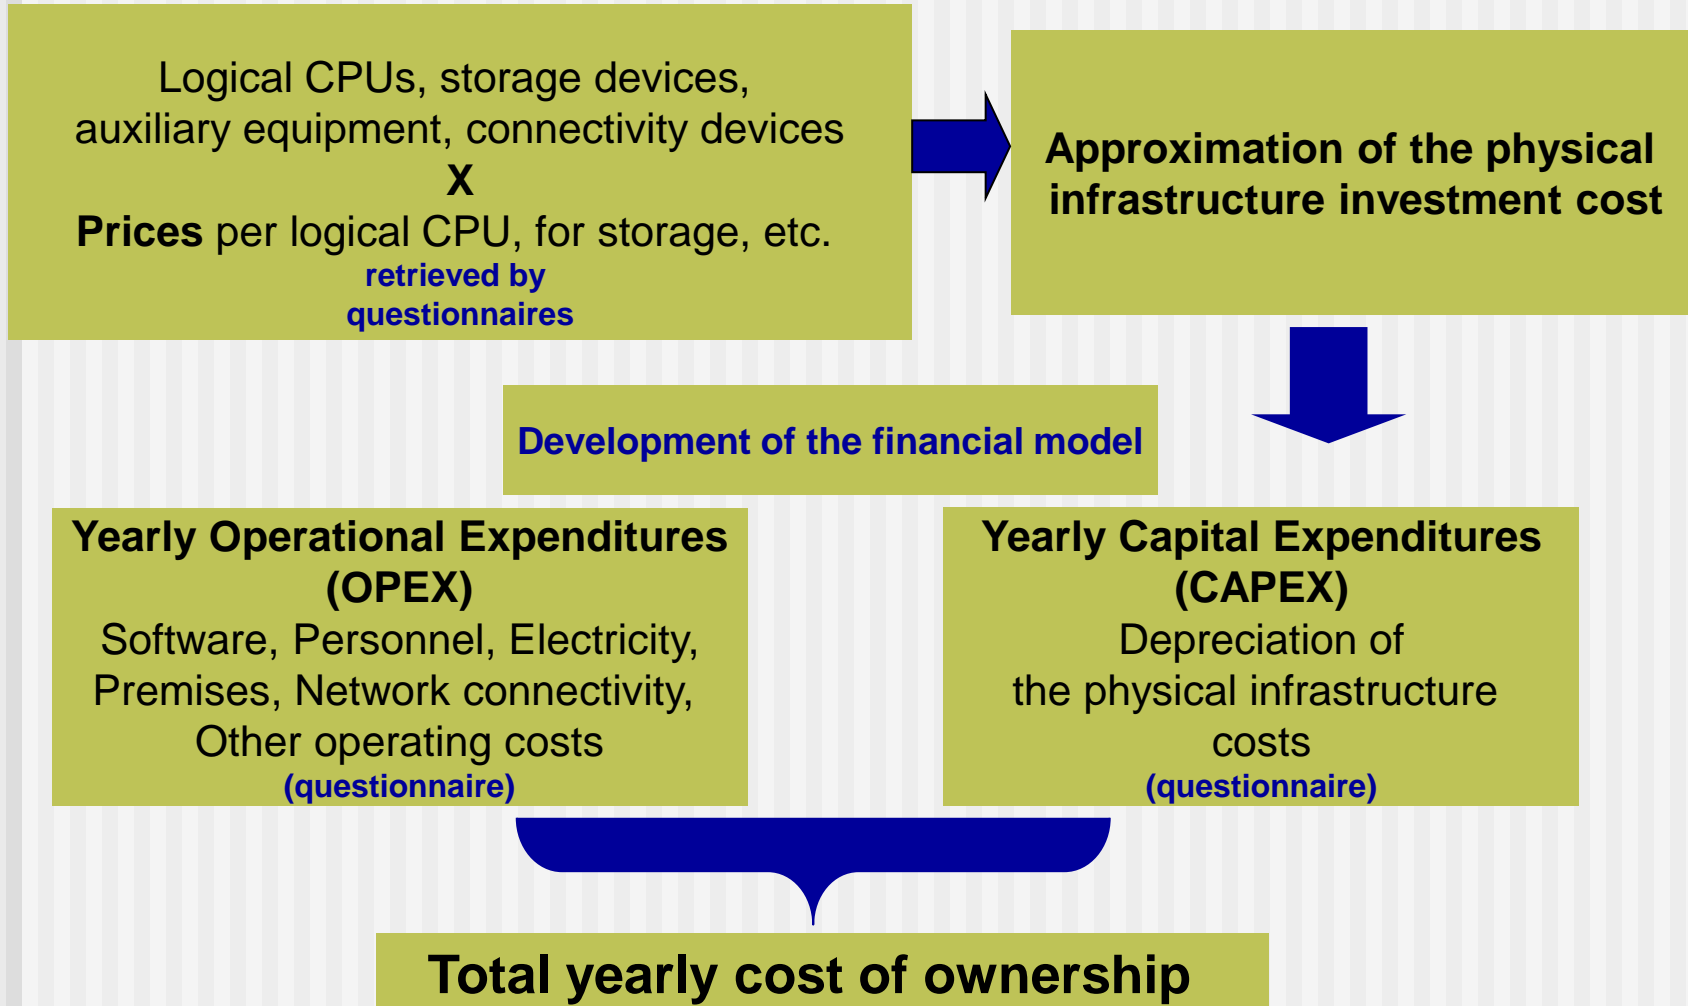

Overall approach

- 2-phase approach
 - 1st phase: Basic questionnaire
 - 2nd phase: In-depth discussions
 - Interviews to cross-check data and get more info!
- Questionnaire launched this month!
 - www.efiscal.eu/survey
- Interested in feedback from:
 - NGI/PRACE country coordinators!
 - Other HPC/HTC site managers!
- Contribute to the sustainability discussions

Methodology

Methodology

Contributing to sustainability..

- Special attention:
 - Performance benchmarking with commercial clouds
 - **N.B.** Can't compare prices with costs!
 - Confidentiality/Anonymity of data!
 - Increase response rate, catch "outliers" and non-standard operational models
 - Cross-checks/validation
 - Inclusion of considerations beyond "plain" cost
 - Trust, reliability, customer satisfaction...
- Outputs:
 - Generic cost model
 - Cost per CPU core, Capex/Opex ratio, Personnel per CPU core...
- Cost is different from value!

Thanks!

- All material and questionnaire available in www.efiscal.eu
- Looking forward to collaborating with you!

e-FISCAL

Project in a nutshell

- **Project acronym:** e-FISCAL
- **Contract n° :** RI-283449
- **Project type:** CSA-SA
- **Start date:** 01/08/2011
- **Duration:** 18 months (end 31/1/2013)
- **Total budget:** 392.523 €
- **Funding from the EC:** 349 999 €
- **Total funded effort in PMs:** 33.75
- **Web site:** www.efiscal.eu
