

## Panel session

**Annaïg LE GUEN**  
**PRACE**

Background : Engineer and PhD in Fluid dynamics and turbulence simulation

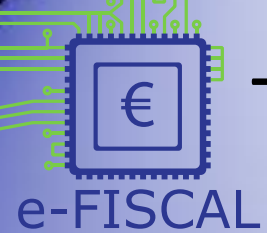

**CNRS** National Center for Scientific research : interdisciplinary programmes and Strategy ; director of the unit in charge of very large research infrastructures

**Ministry of higher education and research** : coordination of very large infrastructures. French delegate to FP7 Programme Committee on infrastructures, and to the ERIC Committee. French Delegate at EMBL Council, member of GENCI's Council...

Now in **GENCI** : management of partnerships, French representative in PRACE

# The HYBRID approach of PRACE : there is no alternative to begin to work together

- From national opportunities to **European competitiveness**
- Towards a **unique peer review** process, for scientists, with open R&D for industry. **Access based on excellence**
- Construction of a European **ecosystem** (national level, Tier-0 to Tier-2...)

The HYBRID approach of PRACE : there is no alternative to begin to work together

- **Mutualisation** of European resources for efficiency
- To develop the use by scientific communities, to create innovation in all directions : **user, provider, co-developer**
- **To create Metrics of success**, return on investment, quality level, project management
